

PLANET NETWORKS SURVEY

Planet Networks, based in Newton, is in the process of expanding their high speed internet coverage territory and is building south on Route 94 into Hardwick, Blirstown, Knowlton, Frelinghuysen and multiple Sussex County towns.

Hardwick residents, if you haven't already submitted your name to Planet Networks to express your interest in subscribing to their internet service, please visit <https://GetPlanetFiber.com> and let them know. Planet Networks will plan to build in those areas where residents have expressed an interest. otherwise, some areas are going to be bypassed due to lack of people filling out the survey.

This is the time to act. We have all been complaining for many years about the poor quality internet service available here so please take a few minutes to complete and submit the survey.

Note that after you enter your address you will see a message that says service is not available yet ; you **MUST then go to the next step and enter your email address and phone number and complete the survey to indicate that you want their service.**

There is also a speed test to run from your current landline connection (or WiFi at home) as the results may help qualify for federal funding dedicated to bring internet services to underserved and rural areas. If you are not happy with your current internet provider, we finally have an opportunity to bring a reliable high speed internet to our area so please make every effort to provide your information using the link provided above.
