## **Sunday March 4 Update**

At our daily teleconference today , JCP&L reports that the number of homes without power in Hardwick is now 370, compared with 688 yesterday. The ETR (Expected Date of Restoration) for the rest of the residences in the North Warren area is Wednesday, March 7 at 11:30pm. Let's hope it is sooner than that.

In the meantime please be aware that the warming center at North Warren HS is open today and tomorrow from 4pm - 9pm. You can also recharge your devices, get free water and take a shower.

Please continue to exercise extreme care regarding downed wires when driving or walking and under no circumstance touch or handle a downed wire. Please contact JCP&L directly to report any downed poles and wires.

If you have not already called JCP&L to report your outage, do so immediately. do not assume that your neighbor has already called it in.

Finally, if your electric service needs to be replaced be advised that you will need a permit and a licensed electrician before JCP&L will do the work.

Further updates will be provided tomorrow. Thank you.
