Saturday March 3 Update

This storm has resulted in major damage across Northwest NJ and Hardwick has been hit particularly hard. Our DPW team has worked through the night to clear the roads and identify areas with downed wires. If you do need to drive somewhere please exercise extreme caution.

I have a conference call w/JCP&L this afternoon and will post the call summary on this site. Mayor Lance and I have been in constant communication w/JCP&L since yesterday and it is likely to be days before power can be fully restored to all of Hardwick. We will posting updates here regarding any information about warming centers, cell phone charging and water distribution.

Kevin Duffy
